SUMMARY

- Software developer with an **MCA in Data Science** (CGPA: 9.3) and hands-on experience across Python, full-stack development, and workflow automation.
- Built and shipped independent projects, including a full-stack **machine learning platform** integrating **15 algorithms** and a **privacy-preserving data synthesis** tool.
- Completed a **five-month internship** at Craloft, automating business workflows using Python, Node.js, and n8n.
- Looking to apply data-driven engineering skills to build practical, high-impact solutions.

WORK EXPERIENCE

Developer Intern, Craloft

Dec 2023 - Apr 2024

- **Key Project — FileFlow:** Automated Amazon & Flipkart seller operations using n8n and Python, handling **400+ product listings** daily with **ETL** pipelines for data extraction, cleaning, and transformation.
- Designed and maintained n8n workflows end-to-end, collaborating with the **n8n community** to troubleshoot and refine implementations.
- Extended workflow capabilities with custom automation scripts in **Node.js** beyond n8n's native nodes.
- Improved seller data accuracy via data validation and monitoring workflows, reducing manual workload by **30%**.

PROJECTS

ML Stream

May 2026 | [Live Project](#)

- Built a full-stack **machine learning platform** using **Python, Flask, React, and Vite** supporting dataset upload, visualization, and preprocessing.
- Integrated **15 machine learning algorithms** covering classification and regression, with automated model evaluation and performance tracking.
- Added downloadable trained models and AI-powered result analysis to streamline experimentation and decision-making.

Synthetic Data Generator for Privacy

March 2026 | [Github](#)

- Built an interactive **Streamlit** application to generate privacy-preserving synthetic datasets using **SDV**.
- Implemented automatic column-type detection to determine which fields require synthesis.
- Added visual comparisons and correlation heatmaps to validate statistical fidelity against source data.
- Enabled CSV export of synthetic datasets for downstream AI/ML modeling and analysis.

EDUCATION

Alliance University

Master of Computer Applications - Data Science, CGPA: **9.3**

Sep 2024 – May 2026

Bangalore, Karnataka

H.N.G University

Bachelor of Computer Applications, CGPA: **8.17**

Jun 2021 – Mar 2024

Patan, Gujarat

SKILLS

Languages & Frameworks: Python, JavaScript, SQL, Node.js, Flask, React, Vite, Streamlit, HTML & CSS.

Tools & Platforms: Git, GitHub, GitLab, VS Code, N8N (Nodemation), Jupyter Notebook, NumPy, Pandas, Matplotlib, SDV, Heroku.

Machine Learning: NumPy, Pandas, Matplotlib, Data cleaning, feature engineering, Regression classification, clustering.
